

StudySync

Cloud-Based Assignment Management System

Presented by : Kuunal Mistry

App ID: 2410130

TY B. Tech – Semester V

Course: Cloud Application Development (CAP 303)

Academic Year: 2026–2027

Supervisor : Dr. Kunal Meher

Project Overview :

StudySync is a cloud-based web application designed to help students manage their academic assignments, subjects, and uploaded files from a centralized platform.

Key Goals :

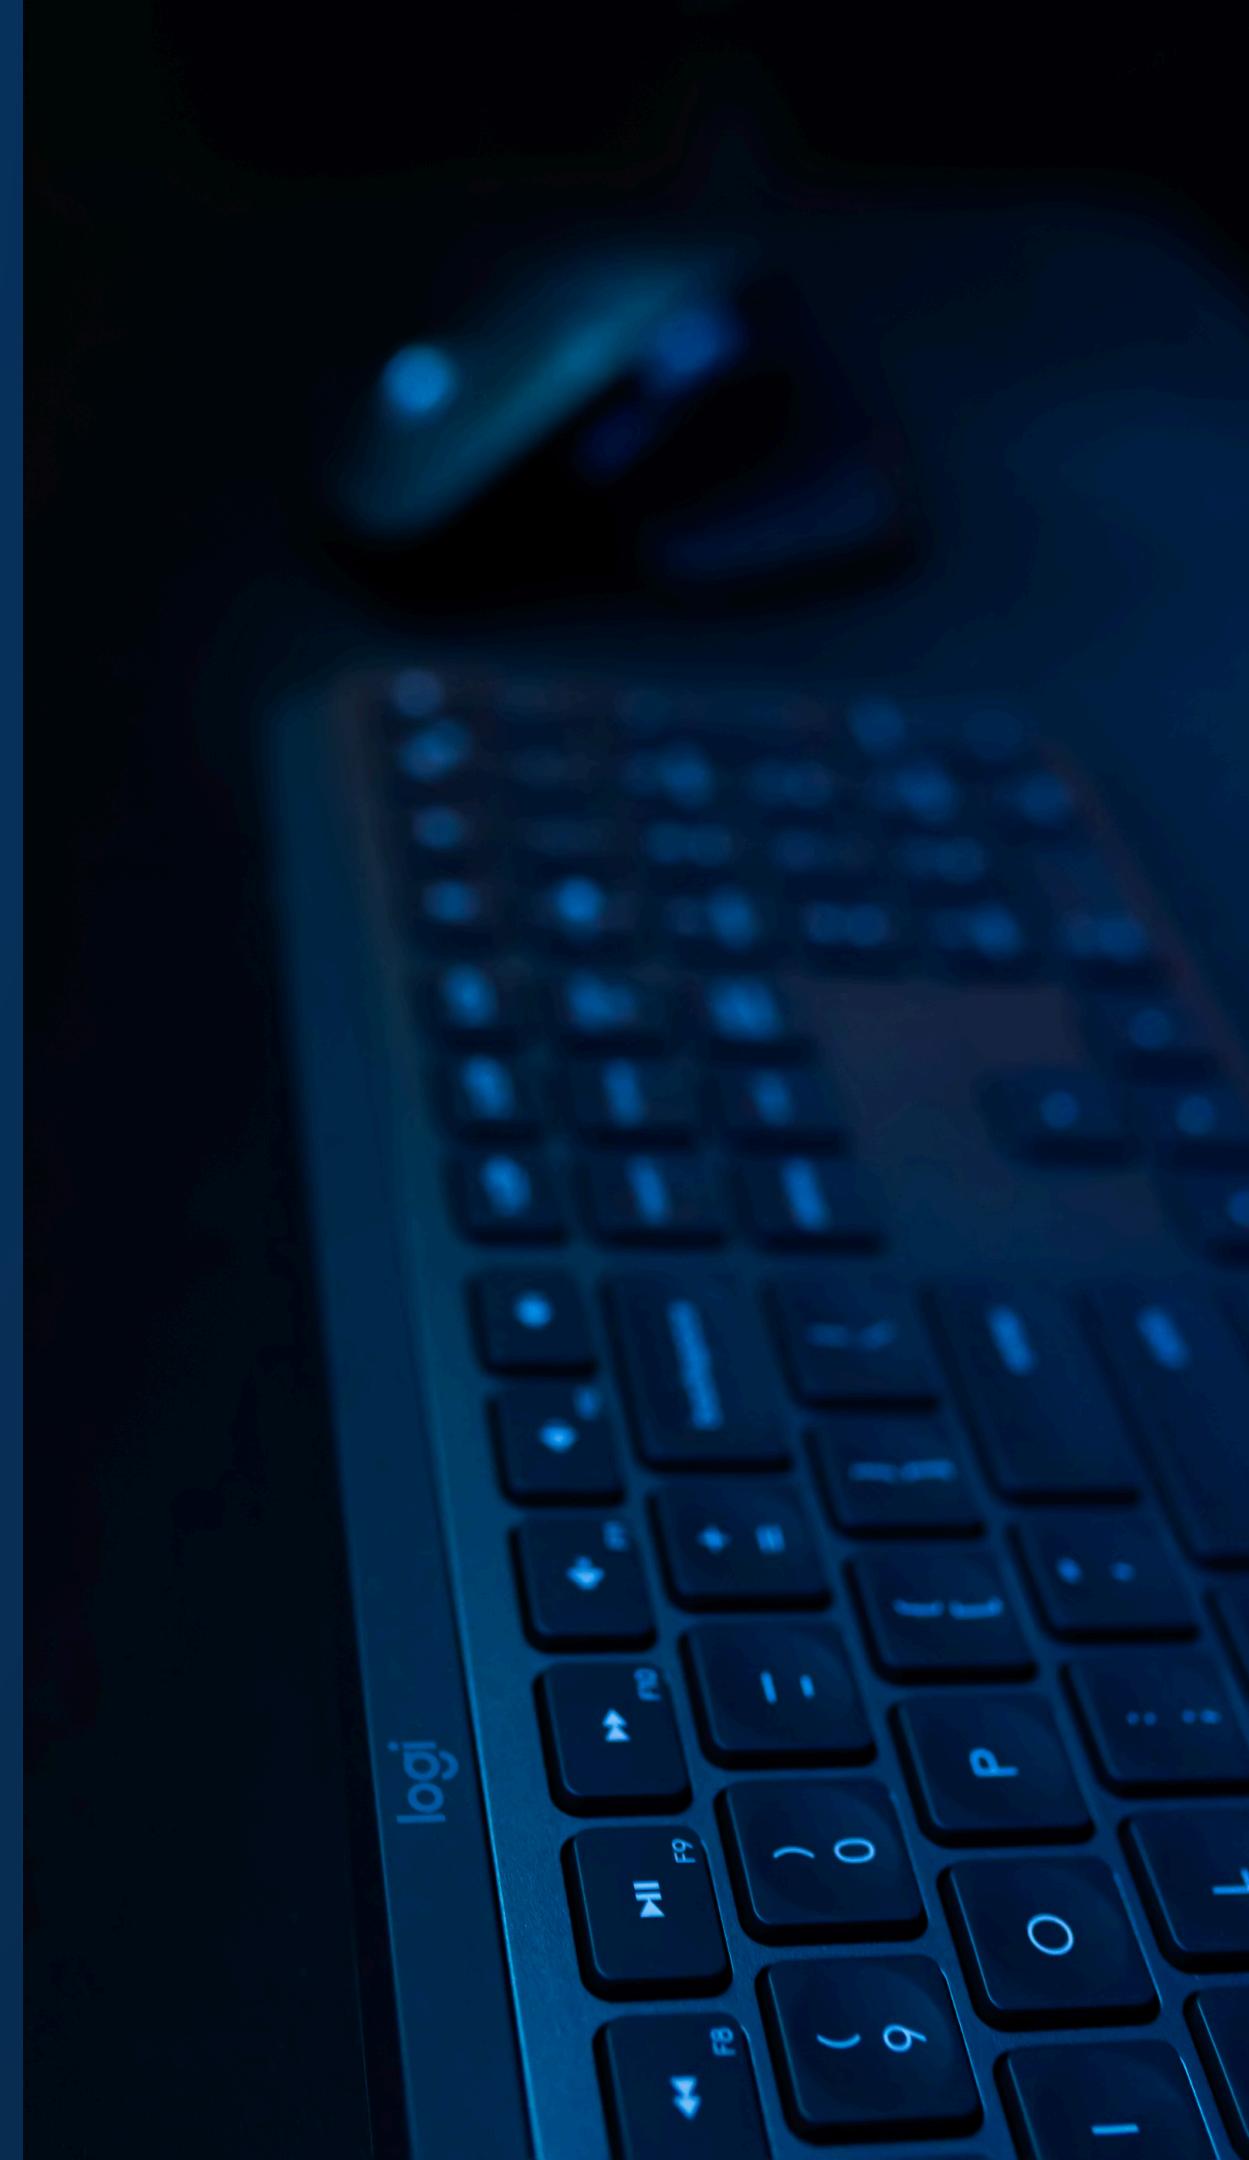

- Organize assignments efficiently
- Manage subjects and deadlines
- Upload and manage academic files
- Provide reliable cloud-based access
- Demonstrate integration of multiple cloud services

Technologies & Cloud Architecture

Technology Stack

- Frontend : HTML, CSS, JavaScript, Bootstrap
- Backend : Python, Flask, SQLAlchemy
- Database : Azure Database for MySQL, MySQL 8.4
- File Storage : Amazon S3

Features, Implementation & Testing

01 Assignment Management

- Create assignments
- View assignments
- Edit assignment details
- Delete assignments
- Track academic tasks

02 Subject Management

- Organize assignments by subject
- Maintain structured academic data

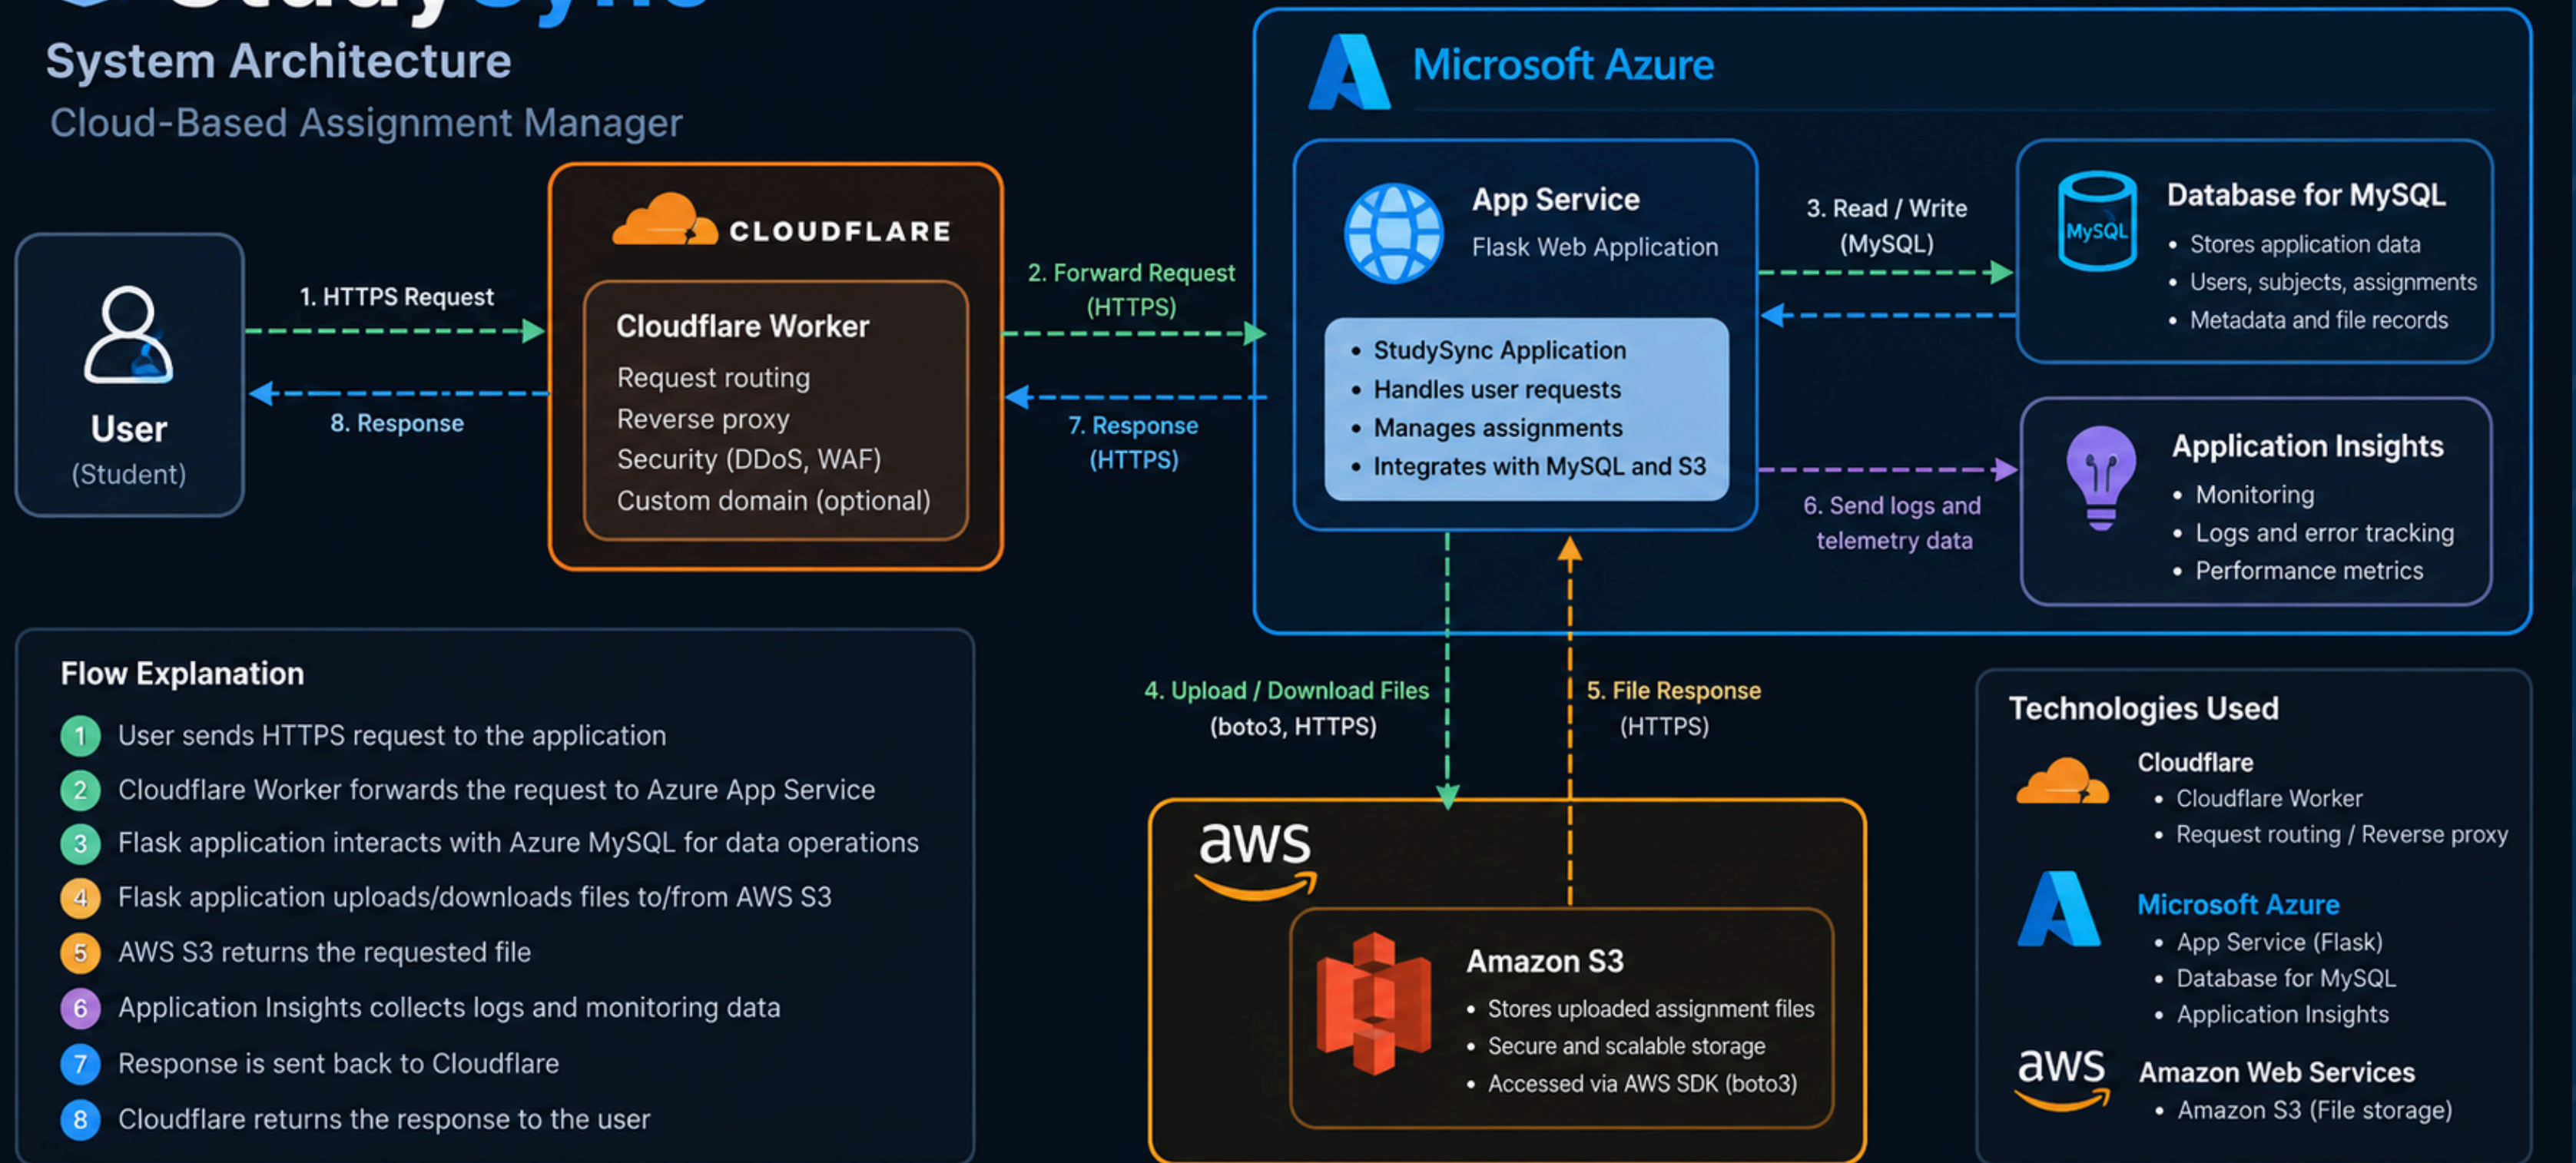

03 File Management

- Upload assignment files
- Store files securely in AWS S3
- Download uploaded files
- Delete files when required

Cloud-Based Assignment Manager

Deployment, Results & Conclusion

Application URL

<https://studysync.kuunalmistry.workers.dev>

Results :

- Successfully deployed StudySync to Azure
- Integrated three major cloud platforms
- Implemented cloud file storage using AWS S3
- Added application monitoring using Azure Application Insights
- Exposed the application through a Cloudflare Worker
- Verified major application and cloud functionalities
